

## Vaughan Aggregate Trophy 2022

Here it is at long last, the result of the Vaughan after the 5 Champs, and we have a clear winner. Bridget has found some extra speed recently, perhaps it's the Cat-and-mouse training, maybe it's the fact that she's not on Junior restricted gears any more, or could it be the extra challenge of having another woman to ride against? Mike Beart has a great turn of speed too, winning the Championship and coming close in the improvements department, maybe he'll take it more seriously next season and ride more events.

### The Excel table.

One event to go and it's tight at the top, 10 points separating the top four places. Bridget's ride in the 5 brings her into the top 10. I see that only the top three have ridden all events so far. All the main contenders have "previous" on the Hillclimb, so we should see a proper result from these guys.
